# Clever Packing

Advanced functionality for a better packing process

**Are you frustrated by the lack of control over your packing process in Dynamics 365 Business Central? Improve visibility and reduce overspend on shipping due to incorrect weights and oversized boxes.**

Clever Packing transforms the packing process by providing accurate product information and packaging recommendations through Dynamics 365 Business Central, enabling you to increase efficiency, reduce shipping costs and minimise human errors.

The App complements the standard Dynamics 365 Business Central picking and shipping functionality with advanced features such as comprehensive operator traceability, intelligent packing station setup, integrated weigh scale support, and detailed packaging inventory management. This empowers businesses to overcome traceability challenges, drive greater packing efficiency, and elevate overall inventory control for smoother, more reliable warehouse operations.

## Benefits

- Records the details of Packing Operators and the Packing Orders they process.
- Intelligent packaging suggestions, reducing shipping costs and improving packaging efficiency
- Weigh scales are integrated through Clever PrintNode which allows for accurate capturing of package weight, essential for shipping calculations.
- Track and consume Packaging Items for accurate inventory costing.
- Touchscreen interface for simple/efficient user operation
- Integration with Clever Shipment Management and Clever Shipping Agent Integration

## Requirements

Dynamics 365 Business Central

## Flexibility to generate packing orders from Microsoft Dynamics 365 Business Central

You can also generate packing orders directly from Dynamics 365 Business Central. As with the Packing Portal, all order information is stored centrally to ensure accurate fulfilment every time.

SMALL-BOX	Small Cardboard Box	A2	100	100	100	1,000,000	0	0	PACK-01

## Smart and seamless integration

Experience seamless integration with features like weigh scale support via PrintNode, advanced barcode handling for GS1 and custom formats, flexible shipment and invoice management, and comprehensive document tools including Clever Labelling, Comments, and Document Links. It also works smoothly with other Clever Apps, such as Shipping Agent Integration and Shipment Management.

## Create a packing order in no time!

Packing Orders are easily generated in the Packing Portal by scanning the container. The portal connects picking to dispatch, confirming all items are properly packed, labelled, and documented before leaving the warehouse. Clever Packing eliminates manual documentation and reduces packing errors.
